-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to a catalyst, a process for producing a catalyst, and a process for making a lower aliphatic carboxylic acid ester, classified in class/subclass 502/209, 305, 306 and 321 (for the catalyst and process for producing said catalyst, and class/subclass 560/231 and 241 (for the process of making an ester).
- II. Claims 23-36, drawn to a catalyst support and a catalyst comprising said support, classified in class/subclasses 502/209, 305, 306, 321 and 439.

The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on catalysts of differing composition.

Possibly, applicants will opine that this Requirement is improper due to the overlap of classes/subclasses in which the catalyst and catalyst support claims are classified, in both Groups I and II. In response, the examiner would point out that Group II includes a subclass (409) not common to Group I, and the claims to production of esters are class 560 subject matter, also not common to Group II. The search of the catalyst and process-of-producing-a-catalyst claims in Group I will not entail a full search of Group II subject matter, and the search of Group II subject matter will not include a search of the class 560 subject matter of Group I.

Art Unit: 1624

These inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification. The two inventions thus require different searches. Because of the separate status in the art, and different fields of search required, restriction for examination purposes as indicated herein is proper.

Conclusion
